Candidate list of 553 substances

Annex 1: Candidate list of 553 substances

Presented are all substances categorized in Group I, II or III. It should be emphasized that Group III contains 205 substances, indicated with a '*', that were out selected because smiles notations were not readily available and therefore QSAR calculations could not be carried out. The number in between brackets behind the chemical name refers to the chemical number in Annex 9 (Working list of 564 chemicals with their literature source).
